

POSSIBLE?

What is happening to me? Am I turning into Chewbacca? Into a

WEREWOLF?

The werewolf theory sure would explain a lot. I've been feeling like a mutant lately. I can wake up as chipper as a newborn chic, and then bam! Ten minutes later, I feel like biting someone.

Honestly, at this point, I actually wouldn't mind turning into a werewolf, or even a zombie. I don't feel like being me today anyway.

Being **ME** these days is absolutely

EXHAUSTING.

I just can't deal with my own brain anymore.
It's constantly spinning out of control and
churning out tons of **CRAZY** ideas.

ALL THE TIME.

In class. When someone's talking to me.
When I'm watching a movie.

I CAN NEVER
TURN IT OFF.
EVER.

Not even when I'm trying to go to sleep.
